

Virginia Medicare-Medicaid Plan Quality Withhold Analysis Results Demonstration Year 2 (Calendar Year 2016)

The Medicare-Medicaid Financial Alignment Initiative (FAI) seeks to better serve people who are dually eligible for Medicare and Medicaid by testing person-centered, integrated care models. In order to ensure that dually eligible individuals receive high quality care and to encourage quality improvement, both Medicare and Medicaid withheld a percentage of their respective components of the capitation rate paid to each Medicare-Medicaid Plan (MMP) participating in a capitated model demonstration under the FAI. MMPs are eligible for repayment of the withheld amounts subject to their performance on a combination of CMS Core and State-Specific quality withhold measures.¹ For each measure, MMPs earn a “met” or “not met” designation depending on their achieved rate relative to the benchmark level, or where applicable, the gap closure target.² Based on the total number of measures met, MMPs receive a quality withhold payment according to the following tiered scale:

Percent of Measures Met	Percent of Withhold MMP Receives
0-19%	0%
20-39%	25%
40-59%	50%
60-79%	75%
80-100%	100%

This report provides the results of the quality withhold analysis for MMPs in the Virginia Commonwealth Coordinated Care demonstration for Demonstration Year (DY) 2, which covers Calendar Year 2016. On the following page, Table 1 provides results for each CMS Core measure, Table 2 provides results for each State-Specific measure, and Table 3 provides summary results for the quality withhold analysis. In Tables 1 and 2, measures that also utilize the gap closure target methodology are marked with an asterisk (as noted above, for these measures, MMPs can earn a “met” designation by meeting the benchmark or the gap closure target).

For more information about the quality withhold methodology, measures, and benchmarks, refer to the Medicare-Medicaid Capitated Financial Alignment Model CMS Core Quality Withhold Technical Notes for DY 2 through 5 and the Virginia Quality Withhold Technical Notes for DY 2 through 3. These documents are available on the CMS website at the following link: <https://www.cms.gov/Medicare-Medicaid-Coordination/Medicare-and-Medicaid-Coordination/Medicare-Medicaid-Coordination-Office/FinancialAlignmentInitiative/MMPInformationandGuidance/MMPQualityWithholdMethodologyandTechnicalNotes.html>.

¹ CMS Core measures apply consistently across all capitated model demonstrations, unless a certain measure is inapplicable due to differences in demonstration design or timing/enrollment constraints. State-Specific measures apply to a specific capitated model demonstration. Note that the number, type, and complexity of State-Specific measures vary depending on key areas of interest for the respective demonstration.

² For certain measures, an MMP can also earn a “met” designation if the MMP closes the gap between its performance in the prior calendar year and the benchmark by a stipulated improvement percentage (typically 10%). The gap closure target methodology applies to most CMS Core measures. For State-Specific measures, states have the discretion to determine whether the gap closure target methodology applies.
