Biden-Harris Administration Increases Medicare Payment for Life-Saving COVID-19 Vaccine

On March 15, CMS increased the Medicare payment amount for administering the COVID-19 vaccine. This new and higher payment rate will support important actions taken by providers that are designed to increase the number of vaccines they can furnish each day, including establishing new or growing existing vaccination sites, conducting patient outreach and education, and hiring additional staff. At a time when vaccine supply is growing, CMS is supporting provider efforts to expand capacity and ensure that all Americans can be vaccinated against COVID-19 as soon as possible.

Effective for COVID-19 vaccines administered on or after March 15, 2021, the national average payment rate for physicians, hospitals, pharmacies, and many other immunizers will be \$40 to administer each dose of a COVID-19 vaccine. This represents an increase from approximately \$28 to \$40 for the administration of single-dose vaccines and an increase from approximately \$45 to \$80 for the administration of COVID-19 vaccines requiring two doses. The exact payment rate for administration of each dose of a COVID-19 vaccine will depend on the type of entity that furnishes the service and will be geographically adjusted based on where the service is furnished.

These updates to the Medicare payment rate for COVID-19 vaccine administration reflect new information about the costs involved in administering the vaccine for different types of providers and suppliers, and the additional resources necessary to ensure the vaccine is administered safely and appropriately.

CMS is updating the set of toolkits for providers, states, and insurers to help the health care system swiftly administer the vaccine with these new Medicare payment rates. These resources are designed to increase the number of providers that can administer the vaccine, ensure adequate payment for administering the vaccine to Medicare beneficiaries, and make it clear that no beneficiary, whether covered by private insurance, Medicare, or Medicaid, should pay cost-sharing for the administration of the COVID-19 vaccine.

Coverage of COVID-19 Vaccines:

As a condition of receiving free COVID-19 vaccines from the federal government, vaccine providers are prohibited from charging patients any amount for administration of the vaccine. To ensure broad and consistent coverage across programs and payers, the toolkits have specific information for several programs, including:

Medicare: Beneficiaries with Medicare pay nothing for COVID-19 vaccines and there is no applicable copayment, coinsurance, or deductible.

Medicare Advantage (MA): For calendar years 2020 and 2021, Medicare will pay providers directly for the COVID-19 vaccine (if they do not receive it for free) and its administration for beneficiaries enrolled in MA plans. MA plans are not responsible for paying providers to administer the vaccine to MA enrollees during this time. Like beneficiaries in Original Medicare, Medicare Advantage enrollees also pay no cost-sharing for COVID-19 vaccines.

Medicaid: State Medicaid and Children's Health Insurance Program agencies must provide vaccine administration with no cost sharing for nearly all beneficiaries during the Public Health Emergency (PHE) and

at least one year after it ends. Through the American Rescue Plan Act signed by President Biden on March 11, 2021, the COVID vaccine administration will be fully federally funded. The law also provides an expansion of individuals eligible for vaccine administration coverage. There will be more information provided in upcoming updates to the Medicaid toolkit.

Private Plans: CMS, along with the Departments of Labor and Treasury, is requiring that most private health plans and issuers cover the COVID-19 vaccine and its administration, both in-network and out-of-network, with no cost sharing during the PHE. Current regulations provide that out-of-network rates must be reasonable, as compared to prevailing market rates, and reference the Medicare reimbursement rates as a potential guideline for insurance companies. In light of CMS's increased Medicare payment rates, CMS will expect commercial carriers to continue to ensure that their rates are reasonable in comparison to prevailing market rates.

Uninsured: For individuals who are uninsured, providers may submit claims for reimbursement for administering the COVID-19 vaccine to individuals without insurance through the Provider Relief Fund, administered by the Health Resources and Services Administration (HRSA).
