

ICD-10 MS-DRGs Version 40.1 Effective April 1, 2023

In an effort to better enable the collection of health-related social needs (HRSNs), defined as individual-level, adverse social conditions that negatively impact a person's health or healthcare, are significant risk factors associated with worse health outcomes as well as increased healthcare utilization, the Centers for Disease Control and Prevention's (CDC) National Center for Health Statistics (NCHS) is implementing 42 new diagnosis codes into the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), for reporting effective April 1, 2023.

The ICD-10 MS-DRG Grouper assigns each case into an MS-DRG based on the reported diagnosis and procedure codes and demographic information (age, sex, and discharge status).

The ICD-10 MCE Version 40.1 uses edits for the ICD-10 codes reported to validate correct coding on claims for discharges on or after April 1, 2023.

The ICD-10 MS-DRG Grouper software package to accommodate these new codes, Version 40.1, is effective for discharges on or after April 1, 2023.

Assignment of the 42 new ICD-10-CM diagnosis codes is as follows:
