These are referred to as the "items in Column 2", below.</p> <p>The following rules describe the computation of the sum that is placed in D0600. These rules consider the "number of missing items in Column 2" which is the number of items in Column 2 that are equal to [-].</p> <p>a) If all of the items in Column 2 have valid values [0,1,2,3], then D0600 must equal the simple sum of those values.</p> <p>b) If any of the items in Column 2 are equal to [-], then count their values as zero in computing the sum.</p> <p>c) If the number of missing items in Column 2 (as defined above) is equal to one, then compute the simple sum of the nine items in Column 2 that have valid values, multiply the sum by 10/9 (1.111), and place the result rounded to the nearest integer in D0600 (see edit -9013 for rounding rules).</p> <p>d) If the number of missing items in Column 2 (as defined above) is equal to two, then compute the simple sum of the eight items in Column 2 that have valid values, multiply the sum by 10/8 (1.250), and place the result rounded to the nearest integer in D0600 (see edit -9013 for rounding rules).</p> <p>e) If the number of missing items in Column 2 (as defined above) is equal to three or more, then D0600 must equal [-].</p> |

The MDS Submission System will recalculate the value in D0600. If the recalculated value differs from the submitted value, a fatal error message will be issued and the record will be rejected.
