About this document

The intent of this software release is to assist any providers who may want to conduct any specific analysis using both the ICD-9 and the ICD-10 versions of MCE.

The Medicare Code Editor (MCE) detects and reports errors in the coding claims data. This manual contains a description of each coding edit with corresponding ICD-9-CM code lists.

The coding edit information in this manual is effective from 10/01/2015 to 09/30/2016.

Chapter 1: Edit code lists

Following is a list of current edits described in this chapter.

1. Invalid diagnosis or procedure code
2. E-code as principal diagnosis
3. Duplicate of PDX
4. Age conflict
5. Sex conflict
6. Manifestation code as principal diagnosis
7. Non-specific principal diagnosis (Discontinued as of 10/01/07)
8. Questionable admission
9. Unacceptable principal diagnosis
10. Non-specific O.R. procedure (Discontinued as of 10/01/07)
11. Non-covered procedure
12. Open biopsy check (Discontinued as of 10/01/10)
13. Bilateral procedure
14. Invalid age
15. Invalid sex
16. Invalid discharge status
17. Limited coverage
18. Wrong procedure performed
19. Procedure inconsistent with length of stay

1. Invalid diagnosis or procedure code

The Medicare Code Editor checks each diagnosis including the admitting diagnosis and each procedure against a table of valid ICD-9-CM codes. If an entered code does not agree with any code on the internal list, it is assumed to be invalid or that the 4th or 5th digit of the code is invalid or missing.

For a list of all valid ICD-9-CM codes, see volumes 2 (diseases) and 3 (procedures) of the *International Classification of Diseases, 9th Revision, Fourth Edition, Clinical Modification (ICD-9-CM)*.

2. E-code as principal diagnosis

E-codes are ICD-9-CM codes beginning with the letter E. They describe the circumstance causing an injury, not the nature of the injury, and therefore should not be used as a principal diagnosis.

3. Duplicate of PDX

Whenever a secondary diagnosis is coded the same as the principal diagnosis, the secondary diagnosis is identified as a duplicate of the principal diagnosis.

4. Age conflict

The Medicare Code Editor detects inconsistencies between a patient's age and any diagnosis on the patient's record. For example, a five-year-old patient with benign prostatic hypertrophy or a 78-year-old patient coded with a delivery.

In the above cases, the diagnosis is clinically and virtually impossible in a patient of the stated age. Therefore, either the diagnosis or the age is presumed to be incorrect. There are four age categories for diagnoses in the program:

- **Newborn.** Age of 0 years; a subset of diagnoses intended only for newborns and neonates (e.g., fetal distress, perinatal jaundice).
- **Pediatric.** Age range is 0–17 years inclusive (e.g., Reye's syndrome, routine child health exam).
- **Maternity.** Age range is 12–55 years inclusive (e.g., diabetes in pregnancy, antepartum pulmonary complication).
- **Adult.** Age range is 15–124 years inclusive (e.g., senile delirium, mature cataract).

The following pages contain lists of ICD-9-CM diagnosis codes with corresponding English descriptions for each of the age categories described above.

5. Sex conflict

Medicare Code Editor detects inconsistencies between a patient's sex and any diagnosis or procedure on the patient's record. For example, a male patient with cervical cancer (diagnosis) or a female patient with a prostatectomy (procedure).

In both instances, the indicated diagnosis or the procedure conflicts with the stated sex of the patient. Therefore, either the patient's diagnosis, procedure or sex is presumed to be incorrect.

The following pages contain lists of male and female related ICD-9-CM diagnosis and procedure codes with corresponding English descriptions.

6. Manifestation code as principal diagnosis

Manifestation codes describe the manifestation of an underlying disease, not the disease itself, and therefore should not be used as a principal diagnosis.

The following list contains ICD-9-CM diagnoses with corresponding English descriptions identified as manifestation codes.

7. Non-specific principal diagnosis

Effective 10/01/07, the non-specific principal diagnosis edit was discontinued and will appear for claims processed using MCE version 2.0–23.0 only.

8. Questionable admission

Some diagnoses are not usually sufficient justification for admission to an acute care hospital. For example, if a patient is given code 4011 for benign hypertension, then the patient would have a questionable admission, since benign hypertension is not normally sufficient justification for admission to a hospital.

The following list contains diagnosis codes with corresponding English descriptions identified as questionable admission when used as a principal diagnosis.

9. Unacceptable principal diagnosis

There are selected codes that describe a circumstance which influences an individual's health status but not a current illness or injury, or codes that are not specific manifestations but may be due to an underlying cause. These codes are considered unacceptable as a principal diagnosis.

There are a few usually unacceptable principal diagnosis codes that are considered "acceptable" when a secondary diagnosis is also coded on the record. If no secondary diagnosis is present for this subset of codes, the message REQUIRES SECONDARY DX will appear.

The following pages contain a list of codes with corresponding English descriptions identified as unacceptable when entered as principal diagnosis.

Note: Codes that require a secondary diagnosis are indicated with an asterisk (*).

10. Non-specific O.R. procedure

Effective 10/01/07, the non-specific O.R. procedure edit was discontinued and will appear for claims processed using MCE version 2.0–23.0 only.

11. Non-covered procedure

There are some procedures for which Medicare does not provide reimbursement. There are also procedures that would normally not be reimbursed by Medicare but due to the presence of certain diagnoses are reimbursed.

The following page contains lists of non-covered procedure codes with corresponding English descriptions, and explains the circumstances in which the edit is applied.

Non-covered procedures

1. The following criteria are retroactive effective November 6, 2006.

The procedure shown below is identified as a non-covered procedure **except** when combined with non-operating room procedure code 0065 (Perc ins intracran stent).

Procedure

0062 Perc angio intracran ves

2. The following criteria are retroactive effective April 26, 2006.

ICD-9-CM procedure codes 5280 (Pancreat transplant NOS) and 5282 (Pancreatic homotransplan) alone [without 5569 (Kidney transplant NEC)] are considered "Non-covered procedures" **except** for the following condition:

When either 5280 or 5282 is combined with at least one principal or secondary diagnosis code from the following diagnoses list:

Open biopsy check

Effective 10/01/10, the open biopsy check edit was discontinued and will appear for claims processed using MCE version 2.0–26.0 only.

13. Bilateral procedure

Certain codes do not accurately reflect procedures performed in one admission on two or more *different* bilateral joints of the lower extremities. A combination of these codes shows a bilateral procedure when they could be procedures performed on a single joint (i.e., duplicate procedures). For example, if 8151 (Total hip replacement) and 8152 (Partial hip replacement) are both coded on the claim, the edit "bilateral procedure" will appear.

This edit instructs the fiscal intermediary to ensure that these procedures were performed on two separate joints. However, if 8151 (Total hip replacement) is coded twice, the edit would not appear because this signifies a true bilateral procedure.

The following list contains the joint replacement procedure codes with corresponding English descriptions identified as "bilateral procedure" whenever two or more *different* joint procedures are coded, and the principal diagnosis causes assignment to MDC 8.

17. Limited coverage

For certain procedures whose medical complexity and serious nature incur extraordinary associated costs, Medicare limits coverage to a portion of the cost.

The limited coverage edit indicates the type of limited coverage. (e.g., Heart transplant-Limited coverage, Lung transplant-Limited coverage, etc.)

The following is a list of limited coverage procedure codes with corresponding English descriptions.

Limited coverage

| | |
|------|-------------------------|
| 3222 | Lung vol reduction surg |
|------|-------------------------|

| | |
|------|--------------------------|
| 3350 | Lung transplant NOS |
