\* These data are estimated, based on a hypothetical, historical period of performance. It is used as a proxy adjustment for the FY 2013 Hospital VBP payment adjustment factor, which we will not know until the actual FY 2013 performance period ends and the values are computed. For FY 2013, this will not occur until after the

FY 2013 IPPS/LTCH PPS proposed rule is finalized (as discussed in section VIII.C.5.d. of the preamble of this proposed rule).
