Refer to the ADL flow chart in the RAI manual to facilitate accurate coding

Instructions for Rule of 3

- When an activity occurs three times at any one given level, code that level.
- When an activity occurs three times at multiple levels, code the most dependent, exceptions are total dependence (4), activity must require full assist every time, and activity did not occur (8), activity must not have occurred at all. Example, three times extensive assistance (3) and three times limited assistance (2), code extensive assistance (3).
- When an activity occurs at various levels, but not three times at any given level, apply the following:
 - When there is a combination of full staff performance, and extensive assistance, code extensive assistance.
 - When there is a combination of full staff performance, weight bearing assistance and/or non-weight bearing assistance code limited assistance (2).

If none of the above are met, code supervision.**1. ADL Self-Performance**Code for **resident's performance** over all shifts - not including setup.
