Any changes listed in these Release Notes that will require an update to the OCM Data Registry will be included in a future release. Practices will be notified of the OCM Data Registry release date through the OCM eNews or other email communication from OCM Support.

Staging and Clinical Data

Since the release of the “OCMR Staging Abstraction Tool PP3 v2.0.1” document in March 2018, the following updates have been identified:

OCMR Staging Abstraction Tool PP4 v2.1

Instructions tab

1. Added description of blue shading that will now enable in certain fields when "Patient_First_Name" and "Patient_Last_Name" are entered into the tool, but no "HICN" or "MBI" is entered
2. Clarified “Delete_Ind Instructions” and “Clinical_Status_Delete_Ind Instructions”
3. Added “Troubleshooting” section

Staging tab

1. Updated to incorporate all changes made in the Master tab of the “OCM Staging and Clinical Data Specifications PP4 v2.1” document
2. Added input messages for “Delete_Ind” and “Clinical_Status_Delete_Ind”
3. Updated formatting so when “Delete_Ind” is “Y,” all fields that are not applicable are grayed out
4. Updated formatting so columns are not fully enabled until the “HICN” or “MBI” or both the “Patient_First_Name” and “Patient_Last_Name” are entered, as well as the “Initial_Diagnosis_Date” and “ICD-10_Cancer_Diagnosis_Code”
5. Within each “Primary_Tumor,” “Nodal_Disease” and “Metastasis” drop-down list, sorted values to list all acceptable clinical values first, followed by all acceptable pathologic values
6. For applicable diagnosis codes in the Lymphoma Group, applied the following “Tumor_Type” drop-down option update:
 - a. Updated from "CNS Lymphoma" to "CNS Lymphoma (Primary central nervous system lymphoma)"
7. For diagnosis codes in the Breast Cancer Group, applied the following “Histology” drop-down option update:
 - a. Updated from "Inflammatory carcinoma" to "Inflammatory"
