Subject: Fall 2016 Past Performance Results Available in HPMS

The results of CMS' review of organizations' performance for the period of July 2015 through August 2016 are now available in HPMS. The analysis was conducted in accordance with the past performance methodology published on December 24, 2015. If you are not already familiar with the methodology, we recommend reading it prior to viewing your results. For organizations that offer both Part C and Part D, there are separate C and D results. Users may view results associated with their particular organizations by going to:

* [For Part C Results] Quality and Performance - Part C Performance Metrics - Part C Past Performance Scores - 2016 Fall

* [For Part D Results] Quality and Performance - Part D Performance Metrics and Reports - Part D Past Performance Scores – 2016 Fall

Please note that while organizations with a performance history of less than 14 months will see values in HPMS, the results are not valid past performance scores due to the organization's limited MA or Part D experience. Should you have any questions about the past performance methodology, findings, or accessing the correct set of results, please send a detailed email with your question or concern to drugbenefitimpl@cms.hhs.gov. Please be sure to include your organization's legal entity name and contract number(s). Thank you.
