

# Section 6

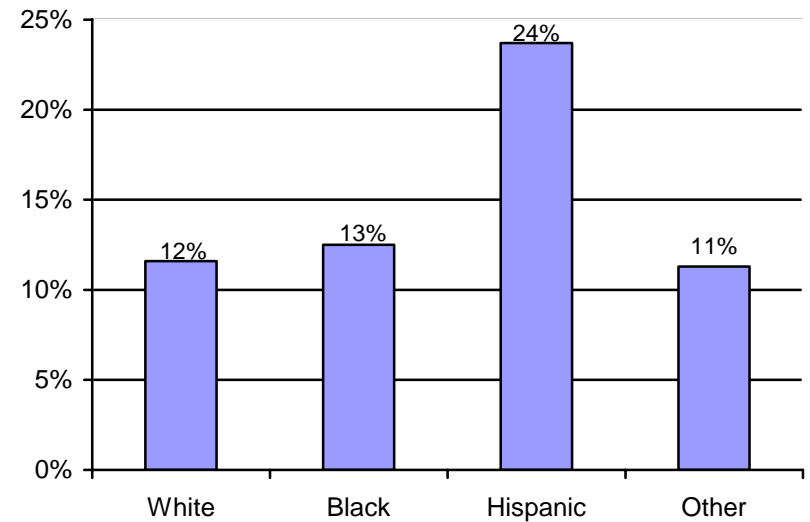

## Membership in Health Maintenance Organizations (HMOs) in 2004

Percentage of Beneficiaries in HMOs, by Age

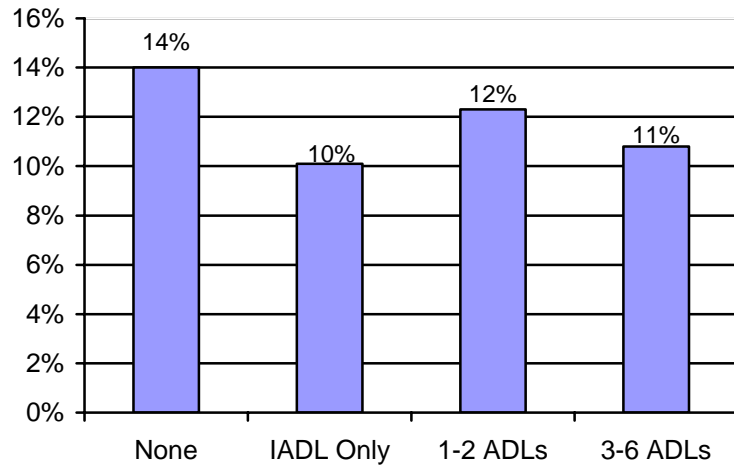

- Beneficiaries who were aged 65 to 84 were more likely to belong to an HMO than any other age group.

Percentage of Beneficiaries in HMOs, by Race and Ethnicity

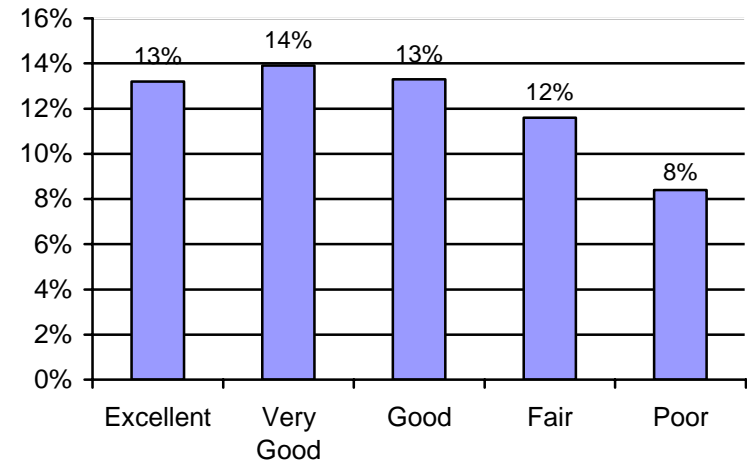

- Hispanic beneficiaries were the most likely to belong to an HMO, while all other races had similar chances.

**Percentage of Beneficiaries in HMOs, by Functional Limitations**

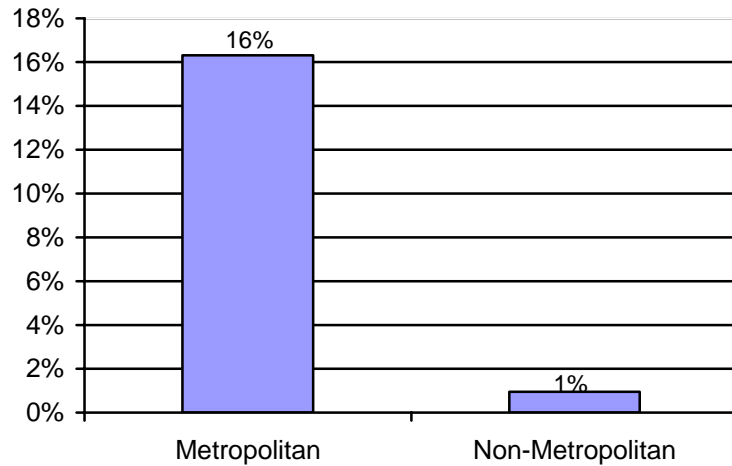

- Beneficiaries with no functional limitations were more likely to join an HMO than beneficiaries with limitations.

**Percentage of Beneficiaries in HMOs, by Health Status**

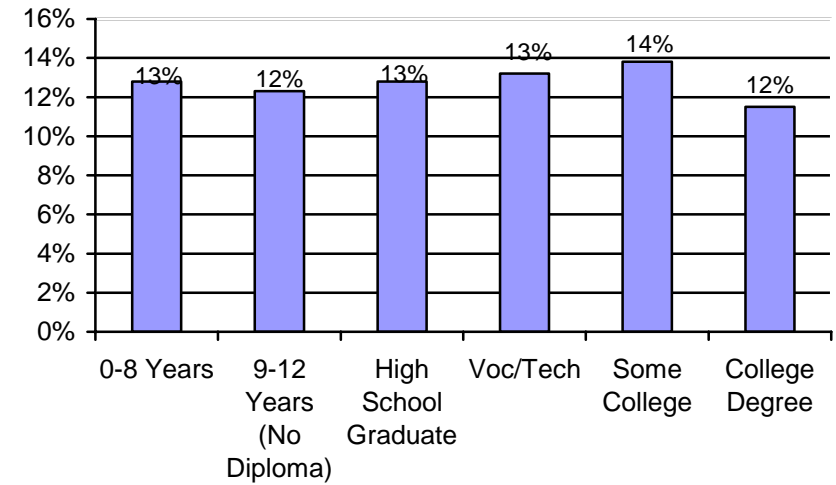

- Beneficiaries in good, very good, or excellent health were more likely to join an HMO than were those in fair or poor health.

**Percentage of Beneficiaries in HMOs, by  
Metropolitan Residence**

- Of beneficiaries in metropolitan areas, 16 percent belonged to an HMO, while only 1 percent of beneficiaries in non-metropolitan areas belonged to an HMO.

**Percentage of Beneficiaries in HMOs, by Years of  
Schooling**

- Beneficiaries with some college education were the most likely to join an HMO, while beneficiaries with a college degree and beneficiaries without a high school diploma were the least likely to join an HMO.
