BOX INSTRUCTIONS

CREATE A CURRENT ROUND DISCOUNT MEMBERSHIP RECORD FOR THIS DISCOUNT MEMBERSHIP PLAN

GO TO DM1 - DMHAVE.

OTHER PROGRAMMING INSTRUCTIONS

BACKGROUND VARIABLE ASSIGNMENTS

DM1 - DMHAVE is asked for each Discount Membership plan the SP had during the previous round. The response to DM1 - DMHAVE flags whether or not the SP had the Discount Membership plan anytime since the previous round. If DM1 - DMHAVE=1/Yes, the SP had the Discount Membership plan anytime during the current round.

DM1 - DMHAVE is stored on the current round DMRO for this DMEM.

Create a current round DMRO for this Discount Membership plan SP had during the previous round where DMRO.DMRODMEM = DMEM.DMEMNUM of Discount Membership plan and DMRO.DMRORND = current round.

DMRO key = DMRO.DMROBASE + DMRO.DMRODMEM + DMRO.DMRORND.

Set DMRO variables as specified below.

Display responses to DMRO.DMSERVIC the last time DM4 - DMSERVIC was asked for this Discount Membership plan in a previous round.

Display in the following order:

If DMSERVIC includes 1/Drugs, display "RX DRUGS".

If DMSERVIC includes 2/Eyes, display "EYE CARE" .

If DMSERVIC includes 8/Hospital, display "HOSPITAL".

If DMSERVIC includes 9/NonMed, display "NON-MED ITEMS".

If DMSERVIC includes 91/Other, display other specify response, DMRO.DMSERVOS.

DESIGN NOTES

The instructions for the report display are based on the last time DM4 - DMSERVIC was asked for this Discount Membership plan in a previous round.

DM4 - DMSERVIC is asked when:

- 1) The Discount Membership plan is new in the current round.
- 2) The SP had the Discount Membership plan during the previous round and still had the Discount Membership plan anytime in the current round, and if it's a fall round.

Because of these rules, the last time DM4 - DMSERVIC was asked for a given Discount Membership plan could be stored on any previous round DMRO.

All previous round DMRO's will be loaded in the database. Excluding the current round DMRO, check each DMRO, starting with the most recent previous round DMRO, until DMRO.DMSERVIC ^= empty. The most recent DMRO where DMRO.DMSERVIC ^= empty is where the last time DM4 - DMSERVIC was collected.

BOX DM2

BOX INSTRUCTIONS

IF THIS IS A FALL ROUND, GO TO DM4 - DMSERVIC.

ELSE GO TO BOX DM3.

OTHER PROGRAMMING INSTRUCTIONS

DESIGN NOTES

If DM1 - DMHAVE=1/Yes, the SP still had the Discount Membership plan that was reported in the previous round anytime in the current round. For these Discount Membership plans that are ongoing, the Discount Membership details are asked as follow up questions in the fall round only.
