DESIGN NOTES

BOX PM1 checks for any PM's reported during the current round utilization sections, including PMs selected at PM2, PM4 and PM6. The PM's entered in utilization sections, PM2, and PM4 do not have number of purchases entered. However, because PM6 could be asked more than once in PM and we do not prohibit PM's from being selected more than once at PM6, BOX PM1 excludes any PM that has been selected in an earlier loop and GETNUM has already been asked.
