

Figure 11.2
Medicare End Stage Renal Disease (ESRD) Program
Enrollment, by Demographic Characteristics, Primary
Diagnosis, and Treatment Modality as of
December 31, 2006

NOTES: The percentage of Medicare enrollees with a functioning graft is based on the total number of Medicare ESRD enrollees (dialysis and functioning graft combined). Diagnosis is the physician's opinion of the primary cause of renal failure. Data published in previous Statistical Supplements were calculated by CMS. Because these data were obtained from a different source, they may very slightly from CMS' prior published estimates.

SOURCE: Calculations prepared by the United States Renal Data System (USRDS). National Institutes of Health. National Institute of Diabetes and Digestive and Kidney Disease; data development by the Office of Research, Development, and Information.
