¹Prior to 1977, the Federal fiscal year was July 1-June 30; beginning on October 1, 1977, the Federal fiscal year became October 1-September 30. The transition quarter (July 1-September 30, 1976) is omitted from this table.

²CMS Form-64, Total Current Expenditures (Line 6): includes Federal and State share; excludes administrative expenses, CMS adjustments, and payments for State Children's Health Insurance Program (SCHIP) expansions.

³Dollar amounts adjusted using a personal consumption expenditure index for health care services, expressed in fiscal year 2008 dollars.

⁴With the release of the comprehensive revision of the national accounts in July of 2009, Bureau of Economic Analysis (BEA) introduced a new classification system for Personal Consumption Expenditures (PCE). With the new classification system and the release of the comprehensive revision estimates, components of medical care were changed, and the base year was updated to the year 2005. PCE health care services now excludes eye exams (currently classified in PCE goods under corrective eyeglasses and contact lenses), and net health insurance (now classified under insurance services). As a result of the PCE classification change, all PCE series were restated for the entire historical period to reflect the new PCE classification structure.

NOTES: Trend data in this table may differ from that in other tables. While the CMS-64 and HCFA-2082/MSIS are not strictly comparable, they are shown together as a gauge when using data from both systems. Refer to glossary for further detail on the difference between the CMS-64 and HCFA-2082 and for changes in the HCFA-2082 form and the Medicaid Statistical Information System (MSIS), which, since 1999, is the sole source of the HCFA-2082 like data. Beginning fiscal year 1998, capitated premiums for Medicaid eligibles in managed care plans were included in the HCFA-2082/MSIS time series.
