1978 ANNUAL REPORT OF
THE BOARD OF TRUSTEES OF THE
FEDERAL SUPPLEMENTARY MEDICAL INSURANCE
TRUST FUND

COMMUNICATION

FROM

THE BOARD OF TRUSTEES,
FEDERAL SUPPLEMENTARY MEDICAL
INSURANCE TRUST FUND

TRANSMITTING

THE 1978 ANNUAL REPORT OF THE BOARD, PURSUANT TO
SECTION 1841(b) OF THE SOCIAL SECURITY ACT,
AS AMENDED

MAY 16, 1978.—Referred to the Committees on Ways and Means
and Interstate and Foreign Commerce and ordered to be printed

U.S. GOVERNMENT PRINTING OFFICE

WASHINGTON : 1978

LETTER OF TRANSMITTAL

BOARD OF TRUSTEES OF THE
FEDERAL SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND,
Washington, D.C., May 15, 1978.

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D.C.

SIR: We have the honor to transmit to you the 1978 Annual Report of the Board of Trustees of the Federal Supplementary Medical Insurance Trust Fund (the 13th such report), in compliance with the provisions of section 1841(b) of the Social Security Act.

Respectfully,

W. MICHAEL BLUMENTHAL,
Secretary of the Treasury
and Managing Trustee of the Trust Fund.

RAY MARSHALL,

Secretary of Labor.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

DON I. WORTMAN,
Acting Commissioner of Social Security
and Secretary, Board of Trustees.

LETTER OF TRANSMITTAL

BOARD OF TRUSTEES OF THE
FEDERAL SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND;
Washington, D.C., May 15, 1978.

The PRESIDENT OF THE SENATE,
Washington, D.C.

SIR: We have the honor to transmit to you the 1978 Annual Report of the Board of Trustees of the Federal Supplementary Medical Insurance Trust Fund (the 13th such report), in compliance with the provisions of section 1841(b) of the Social Security Act.

Respectfully,

W. MICHAEL BLUMENTHAL,
Secretary of the Treasury;
and Managing Trustee of the Trust Fund.
RAY MARSHALL,

Secretary of Labor.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

DON I. WORTMAN,
Acting Commissioner of Social Security
and Secretary, Board of Trustees.

1978 ANNUAL REPORT OF THE BOARD OF TRUSTEES OF THE FEDERAL SUPPLEMENTARY MEDICAL IN- SURANCE TRUST FUND

THE BOARD OF TRUSTEES

The Federal Supplementary Medical Insurance Trust Fund, established on July 30, 1965, is held by the Board of Trustees under the authority of section 1841(b) of the Social Security Act, as amended. The Board is comprised of three members who serve in an ex officio capacity. The members of the Board are the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health, Education, and Welfare. The Secretary of the Treasury is designated by law as the Managing Trustee. The Commissioner of Social Security is Secretary of the Board. The Board of Trustees reports to the Congress once each year in compliance with section 1841(b)(2) of the Social Security Act. This is the 1978 annual report, the thirteenth such report.

ADVISORY COUNCIL ON SOCIAL SECURITY

The Secretary of Health, Education, and Welfare, on February 26, 1978, announced the appointment of an Advisory Council on Social Security under the provisions of section 706 of the Social Security Act. The Council consists of a Chairman and 12 members representing organizations of employers and of employees, self-employed persons, and the public.

Under the law, the Social Security Advisory Council is charged with making a comprehensive study of the status of the social security cash benefit and Medicare programs. This study is to include an examination of the financial status of the trust funds in relation to the long-term commitments of the programs, benefit levels, the scope of coverage, and other aspects of the programs, including their impact on public assistance.

The Council is required to submit its final reports to the Secretary of Health, Education, and Welfare no later than October 1, 1979. After the Council's reports are transmitted by the Secretary to the Congress and to the Board of Trustees of each of the trust funds, the Council will cease to exist. The Council's report and recommendations with respect to the supplementary medical insurance program will be included in the 1980 annual report of the Board of Trustees.

HIGHLIGHTS

(a) Disbursements of the supplementary medical insurance trust fund increased 22 percent in fiscal year 1977 (October 1 through September 30 basis) over 1976 (July 1 through June 30 basis). Most

(1)

of this increase resulted from higher physician fees recognized by the program and the use of more physician services by program enrollees. Other major factors in the increased outlays include greater use of out-patient hospital services and home health services and increased enrollment.

(b) Income to the trust fund increased 48 percent in fiscal year 1977 over 1976. This resulted from increased adequate actuarial rates which determine the general revenue contribution and from increased enrollment in the program. The adequate actuarial rates promulgated included margins to restore the losses to the program during fiscal year 1976.

(c) The trust fund increased \$1,040 million to \$2,279 million during 1977. This resulted from increased income to the program and cost increases below the level anticipated.

(d) In December of 1977, the Secretary of the Health, Education, and Welfare promulgated a standard monthly premium rate of \$8.20 and adequate actuarial rates of \$13.40 for the aged enrollees and \$25.00 for the disabled enrollees for the 12-month period ending June 30, 1979.

(e) An average of 22.7 million persons aged 65 and over were enrolled in the program in fiscal year 1977. This is about 94 percent of the aged population. An additional 2.3 million disabled beneficiaries were enrolled in the same period.

SOCIAL SECURITY AMENDMENTS SINCE THE 1977 REPORT

During 1977 the following public laws affecting the operation of the Federal Supplementary Medical Insurance Trust Fund were enacted:

(a) Public Law 95-142, enacted October 25, 1977, is intended to strengthen the Government's capability to detect, prosecute, and punish fraudulent activities in Federal health care programs. Specifically, the law strengthens program penalty sanctions, requires increased disclosure of information by providers of services and suppliers, and makes improvements in the Professional Standards Review Organization program.

(b) Public Law 95-210, enacted December 13, 1977, provides for reimbursement under the supplementary medical insurance program for medical services provided in rural health clinics by nonphysicians. Prior to this legislation, rural health clinics which did not have a full-time physician were ineligible for Medicare reimbursement.

NATURE OF THE TRUST FUND

The Federal Supplementary Medical Insurance Trust Fund was established on July 30, 1965, as a separate account in the United States Treasury. All the financial operations of the supplementary medical insurance program are handled through this fund.

The major sources of receipts of the trust fund are (1) premiums paid by eligible persons who are voluntarily enrolled in the program and (2) contributions of the Federal Government that are authorized to be appropriated and transferred from the general fund of the Treasury. Eligible persons aged 65 and over have been able to enroll in the program since its inception in July 1966. Since July 1973, disabled persons under age 65, who meet certain eligibility requirements, have also been able to enroll in the program.

The premiums paid by participants are based on the standard monthly premium rate, which is the same for participants aged 65 and over and for disabled participants under age 65. Premiums paid for fiscal years 1967 through 1973 were matched by an equal amount of Government contributions. Beginning July 1973, the amount of Government contributions corresponding to premiums paid by each of the two groups of participants is determined by applying a ratio, prescribed in the law for each group, to the amount of premiums received from that group of participants. The ratio is equal to (1) twice the amount of the adequate actuarial rate applicable to the particular group of participants, minus the amount of the standard monthly premium rate, divided by (2) the amount of the standard monthly premium rate.

Standard monthly premium rates and adequate actuarial rates are promulgated each year by the Secretary of Health, Education, and Welfare. The standard monthly premium rates in effect from the beginning of the program, July 1966 through June 1978, and the rate promulgated for July 1978 through June 1979, are shown in table 1. Adequate actuarial rates in effect from July 1973 through June 1978, and the rates promulgated for July 1978 through June 1979, are also shown.

Another source from which receipts of the trust fund are derived is interest received on investments held by the fund. The investment procedures of the fund are described later in this section.

Section 201(i) of the Social Security Act authorizes the Managing Trustee to accept and deposit in the trust fund unconditional money gifts or bequests made for the benefit of the fund or for any activity financed through the fund.

Expenditures for benefit payments and administrative expenses under the program are paid out of the trust fund. All expenses incurred by the Department of Health, Education, and Welfare and by the Department of the Treasury in carrying out the supplementary medical insurance provisions of title XVIII of the Social Security Act are charged to the trust fund. The Secretary of Health, Education, and Welfare certifies benefit payments to the Managing Trustee, who makes the payments from the trust fund in accordance therewith.

Hospitals, at their option, are permitted to combine their billing for both hospital costs and physician components of radiology and pathology services rendered hospital inpatients by hospital-based physicians. Where hospitals elect this billing procedure, payments are made initially from the hospital insurance trust fund, with reimbursement later to it from the supplementary medical insurance trust fund. The reimbursements so made are on a provisional basis and are subject to adjustment, with appropriate interest allowances, as the actual experience develops and is analyzed.

The Social Security Amendments of 1967 and 1972 authorize the Secretary of Health, Education, and Welfare to develop and conduct a broad range of experiments and demonstration projects designed to determine various methods of increasing efficiency and economy in providing health care services, while maintaining the quality of such services, under the hospital insurance and supplementary medical insurance programs. The costs of such experiments and demonstration projects are paid out of the hospital insurance and supplementary medical insurance trust funds.

Congress has authorized expenditures from the trust funds for constructions, rental, and lease or purchase contract of office buildings and related facilities for use in connection with the supplementary medical insurance program. Both the capital costs of construction financed directly from the trust fund and the rental, lease, or purchase contract costs of acquiring facilities are included in trust fund expenditures. In 1972-75, construction of several large facilities was authorized under purchase contract authority, wherein initial capital costs are borne by the private sector. Under this method of facilities acquisition, trust fund expenditures for use and ultimate Government ownership of a facility are made over periods of from 10 to 30 years. Whatever the manner of acquisition, the net worth of facilities and other fixed capital assets is not carried in the statements of the operations of the trust fund presented in this report. This is because the value of fixed capital assets does not represent funds available for benefit or administrative expenditures and, therefore, is not viewed as being a consideration in assessing the actuarial status of the funds.

That portion of the trust fund which, in the judgment of the Managing Trustee, is not required to meet current expenditures for benefits and administration is invested in interest-bearing obligations of the U.S. Government (including special public-debt obligations described below), in obligations guaranteed as to both principal and interest by the United States, or in certain federally sponsored agency obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States. Obligations of these types may be acquired on original issue at the issue price or by purchase of outstanding obligations at their market price.

The Social Security Act authorizes the issuance of special public-debt obligations for purchase exclusively by the trust fund. The law requires that such special public-debt obligations shall bear interest at a rate based on the average market yield (computed on the basis of market quotations as of the end of the calendar month next preceding the date of such issue) on all marketable interest-bearing obligations of the United States forming a part of the public debt which are not due or callable until after the expiration of 4 years from the end of such calendar month.

TABLE 1.—STANDARD MONTHLY PREMIUM RATES AND ADEQUATE ACTUARIAL RATES

	Standard monthly premium rate	Adequate actuarial rate	
		Participants aged 65 and over	Disabled participants under age 65
July 1966—March 1968	\$3. 00		
April 1968—June 1970	4. 00		
12-mo period ending June 30 of—			
1971	5. 30		
1972	5. 60		
1973	5. 80		
1974	6. 30	\$6. 30	\$14. 50
1975	6. 70	6. 70	18. 00
1976	6. 70	7. 50	18. 50
1977	7. 20	10. 70	19. 00
1978	7. 70	12. 30	25. 00
1979	8. 20	13. 40	25. 00

¹ In accordance with limitations on the costs of health care imposed under Phase III of the Economic Stabilization Program, the standard premium rate for July and August 1973 was set at \$5.80 and \$6.10, respectively. Effective September 1973, the rate increased to \$6.30.

SUMMARY OF THE OPERATIONS OF THE TRUST FUND, FISCAL YEAR 1977

Beginning with fiscal year 1977, the period of the time covered by the fiscal year of the U.S. Government was changed from the 12 months beginning on July 1 of each year and ending on June 30 of the following year to the 12 months beginning on October 1 of each year and ending on September 30 of the following year, in accordance with the Congressional Budget Act of 1974 (Public Law 93-344). This Act further provided that the calendar quarter July-September 1976 be a period of transition from fiscal year 1976, which ended on June 30, 1976, to fiscal year 1977, which began on October 1, 1976.

A statement of the income and disbursements of the Federal Supplementary Medical Insurance Trust Fund in fiscal year 1977, and of the assets of the fund at the beginning and end of the fiscal year, is presented in table 2. Corresponding amounts for the interim period, July-September 1976 (which were not presented in last year's annual report), are also shown in the table.

The total assets of the trust fund amounted to \$1,239 million on September 30, 1976. During fiscal year 1977, total receipts amounted to \$7,383 million, and total disbursements were \$6,342 million. Total assets thus increased \$1,041 million during the year to a total of \$2,279 million on September 30, 1977.

¹ The Interim period is the period from July 1, to Sept. 30, 1976.² A positive figure represents a transfer of interest to the supplementary medical insurance trust fund from the other social security trust funds. A negative figure represents a transfer of interest from the supplementary medical insurance trust fund to the other social security trust funds.³ For explanation, see text.⁴ Includes administrative expenses of the carriers and intermediaries.⁵ A positive figure represents a transfer from the supplementary medical insurance trust fund to the other social security trust funds. A negative figure represents a transfer to the supplementary medical insurance trust fund from the other social security trust funds.

Note: Totals do not necessarily equal the sum of rounded components.

Of the total receipts, \$1,987 million represented premium payments by (or on behalf of) participants aged 65 and over, and \$206 million represented premium payments by (or on behalf of) disabled participants under age 65. Total premium payments amounted to \$2,193 million, an increase of 9.3 percent over the amount of \$2,007 million for the preceding 12-month period. This increase in premiums from participants resulted primarily from (1) the expected growth in the number of persons enrolled in the supplementary medical insurance program, and (2) the increase from \$6.70 to \$7.20 per month in the standard premium rate that became effective on July 1, 1976, and the increase from \$7.20 to \$7.70 per month in the standard premium rate that became effective on July 1, 1977.

Contributions received from the general fund of the Treasury amounted to \$5,053 million. This amount consisted of \$4,026 million representing contributions relating to premiums paid by participants aged 65 and over, \$1,009 million representing contributions relating to the premiums paid by disabled participants under age 65, and \$18 million in interest on delayed transfers of Government contributions.

The remaining \$137 million of receipts consisted almost entirely of interest on the investments of the trust fund.

Of the \$6,342 million in total disbursements, \$5,859 million represented benefits paid directly from the trust fund for health services covered under Title XVIII of the Social Security Act. In addition, transfers were made to the hospital insurance trust fund consisting of \$6 million to adjust for the loss of interest caused by the delay in transferring payments for the costs of radiology and pathology services that were paid initially from the hospital insurance trust fund but that were liabilities of the supplementary medical insurance trust fund.

Total benefit payments from the trust fund in fiscal year 1977, therefore, amounted to \$5,865 million, an increase of 20.2 percent over the corresponding amount of \$4,879 million paid in the preceding 12-month period.

Reference has been made in an earlier section to provisions which authorize payment from the trust fund for costs of experiments and demonstration projects in providing health care services. In fiscal year 1977, payments for such costs amounted to about \$2 million.

The remaining \$475 million of disbursements was for net administrative expenses. Administrative expenses are allocated and charged directly to each of the four trust funds—old-age and survivors insurance, disability insurance, hospital insurance, and supplementary medical insurance—on the basis of provisional estimates. Periodically, as actual experience develops and is analyzed, adjustments to the allocations of administrative expenses and costs of construction for prior periods are affected by interfund transfers, with appropriate interest allowances.

In table 3, the experience with respect to actual amounts of participants' premiums, Government contributions, and benefit payments in fiscal year 1977 is compared with the estimates for fiscal year 1977 which appeared in the 1976 and 1977 annual reports. The actual experience was relatively close to the estimates for premiums, Government contributions, and benefit payments.

TABLE 3.—COMPARISON OF ACTUAL AND ESTIMATED OPERATIONS OF THE SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND, FISCAL YEAR 1977

[Dollar amounts in millions]

Item	Comparison of actual experience with estimates for fiscal year 1977 published in—				
	1977 report			1976 report	
	Actual amount	Estimated amount	Actual as percentage of estimate	Estimated amount	Actual as percentage of estimate
Premiums from participants.....	\$2, 193	\$2, 180	101	\$2, 162	101
Government contributions.....	5, 053	5, 053	100	5, 053	100
Benefit payments.....	5, 867	5, 999	98	5, 905	99

The assets of the trust fund at the end of the interim period totaled \$1,239 million, consisting of \$1,244 million in the form of obligations of the U.S. Government and, as an offset, an extension of credit of \$5 million against securities to be redeemed. This was covered by the redemption of securities on October 1, 1976. The net increase in the par value of the investments owned by the fund during the interim period amounted to \$14 million. New securities at a total par value of \$1,417 million were acquired during the interim period through the investment of receipts. All of these new securities were certificates of indebtedness. The par value of securities redeemed during the interim period was \$1,403 million, including \$1,348 million in certificates of indebtedness. The assets of the trust fund at the end of fiscal year 1977 totaled \$2,279 million, consisting of \$2,232 million in the form of obligations of the U.S. Government and an undisbursed balance of \$47 million. Table 4 shows a comparison of the total assets of the fund and their distribution at the end of the interim period and at the end

of fiscal year 1977. A comparison of the assets of the trust fund with liabilities for incurred but unpaid benefits (and related administrative expenses) is shown in a later section.

Total assets		1,238,508,457.93		2,279,426,202.11

¹ The interim period is the period from July 1 to Sept. 30, 1976.

² Par value, plus unamortized premium, less discount outstanding.

³ The negative figure represented an extension of credit which was covered by the redemption of securities on the 1st day of the following month.

The new increase in the par value of the investments held by the fund during fiscal year 1977 amounted to \$988 million. New securities at a total par value of \$8,387 million were acquired during the fiscal year, through the investment of receipts and reinvestment of funds made available from the redemption of securities. The par value of securities redeemed during the year was \$7,399 million. Included in these amounts is \$7,355 million in certificates of indebtedness that were acquired, and \$7,383 million in certificates of indebtedness that were redeemed, within the fiscal year.

The effective annual rate of interest earned by the assets of the supplementary medical insurance trust fund during the 12 months ending on June 30, 1977 was 7.4 percent. (This period is used because interest on special issues is paid semiannually on June 30 and December 31.) The interest rate on special issues purchased by the trust fund in June 1977 was 7½ percent, payable semiannually.

EXPECTED OPERATIONS AND STATUS OF THE TRUST FUND DURING THE PERIOD OCTOBER 1, 1977 TO DECEMBER 31, 1980

Financing for the supplementary medical insurance program is established annually on the basis of standard monthly premium rates (paid by or on behalf of the participants) and adequate actuarial rates (on which general revenue contributions are based) which are applicable to a period of July 1 through the following June 30. In recent years, allowable fee limits for physician services have also been established to apply to the same July 1 to June 30 period.

Standard premium rates and adequate actuarial rates have been promulgated for periods through June 30, 1979. It has been assumed in this report that financing after that time will be established to cover the incurred expenses of the program.

The projections assume that allowable fees for physician services will increase an average of 8.8 percent for the 12-month period ending June 30, 1978 and will increase an average of 7.9 percent for the 12-month period ending June 30, 1979. The costs per enrollee for institutional services under Part B are projected to increase 25 percent for the 12-month period ending June 30, 1978 over the previous 12 months and an additional 25 percent for the 12-month period ending June 30, 1979.

Table 5 shows the projected operations of the trust fund on a fiscal year basis through fiscal year 1980. Table 5A shows the corresponding development on a calendar year basis. The trust fund increased substantially in fiscal year 1977 due primarily to financing measures intended to improve the status of the trust fund. The adequate rates for the 12-month periods ending June 30, 1978, and June 30, 1979, were promulgated with specific margins to maintain an adequate level of the trust fund. As a result the fund is projected to increase to \$3,588 million by the end of fiscal year 1978 and \$4,273 million by the end of fiscal year 1979.

ACTUARIAL STATUS OF THE TRUST FUND

1. ACTUARIAL SOUNDNESS OF THE SUPPLEMENTARY MEDICAL INSURANCE PROGRAM

The concept of actuarial soundness, as it applies to the supplementary medical insurance program, is closely related to the concept as

it applies to private group insurance. The supplementary medical insurance program essentially is yearly renewable term insurance intended to be self-supporting from premium income paid by the enrollees and from income contributed from general revenue in proportion to premium payments. The law requires the Secretary of Health, Education, and Welfare to establish income on the basis of incurred costs. That is, the income to the program during a 12-month period for which financing is being established must be sufficient to pay for services (including associated administrative costs) expected to be rendered during that period even though payment for some of these services will not be made until after the close of the period. The portion of income required to cover those benefits not paid until after the close of the year is added to the trust fund until needed. Thus, the amount of assets in the trust fund at any time should be no less than the costs of the benefits and administration incurred but not yet paid. Since the income per enrollee (premium plus government contribution rate) is established prospectively, it is subject to projection error. As a result, the income to the program may not be equal to incurred costs; therefore trust fund assets should be maintained at a level which is adequate to cover the impact of a moderate degree of projection error as well as the value of incurred but unpaid expenses.

In testing the actuarial soundness of the supplementary medical insurance program, it is not appropriate to look beyond the period for which the enrollee premium rate and level of general revenue financing have been established. The primary tests of actuarial soundness, then, are that (1) income for years for which financing has been established be sufficient to meet the projected benefits and associated administrative expenses incurred for that period, (2) assets be sufficient to cover projected liabilities which will have been incurred by the end of that time but will not have been paid yet, and (3) assets be sufficient further to protect against the possibility that cost increases under the program will be somewhat higher than assumed in the projection. Even if these tests of actuarial soundness are not met, the program can continue to operate if the trust fund remains at a level adequate to permit the payment of claims as presented.

2. INCURRED EXPERIENCE OF THE SUPPLEMENTARY MEDICAL INSURANCE PROGRAM

The tests of actuarial soundness of the supplementary medical insurance program noted above rely on the incurred experience of the program. Cash disbursements for benefits and administrative expenses by themselves are misleading, due to the relatively large liabilities outstanding at any time for benefits and processing costs that must be paid for services already performed. These liabilities result from the lag between the time that services are performed and the time that payments for them are made.

The experience of the program is substantially more difficult to determine on an incurred basis than on a cash basis. In the early months of program operations, it appears that some bills containing errors were never resubmitted following correction. Payment for

some services is reported only on a cash basis, and the incurred experience must be inferred from the cash payment information. For recent time periods, the tabulations of bills are incomplete due to normal processing delays. Finally, since bills are tabulated only for a sample of beneficiaries, the data is subject to bias and random fluctuation inherent in the sampling process.

Table 6 shows the estimated transactions of the trust fund on an incurred basis. For the reasons stated above, the incurred experience must be viewed as an estimate even for historical years. Various checks, such as cash outlay data, assure that the estimates are reasonably close, however.

TABLE 6.—ESTIMATED INCOME AND DISBURSEMENTS INCURRED UNDER SUPPLEMENTARY MEDICAL INSURANCE PROGRAM, 12-MO PERIODS ENDING JUNE 30, 1967-79

1979.....	2,573	6,564	251	8,434	674	280

¹ Includes administrative expenses incurred prior to the beginning of the program.

3. ACCUMULATED EXCESS OF ASSETS OVER LIABILITIES

The liability outstanding at any time for the cost of services performed for which no payment has been made is referred to as "benefits incurred but unpaid". Estimates of the amount of benefits incurred but unpaid as of June 30 of each year, and of the administrative expenses related to processing these benefits, appear in table 7. For most years of the program, assets have not been as large as outstanding liabilities. Nonetheless, the fund has remained positive, allowing claims to be paid.

¹ Ratio of the excess of assets over liabilities to the following year's total incurred expenditures.

Program financing has been established through June 1979. On the basis of this financing, the status of the trust fund is expected to improve significantly, from an estimated excess of assets over liabilities of approximately \$368 million at the end of June 1977 to a projected \$1,421 million at the end of June 1979. This amounts to 13 percent of incurred expenditures for the following 12-month period, a level which is sufficient to cover the impact of a moderate degree of projection error.

4. SENSITIVITY TESTING

Some of the assumptions underlying the projection presented in this report are highly uncertain, and variations in these assumptions would have a substantial impact on expenditures. In order to test the future status of the program under varying assumptions, a low cost projection and a high cost projection were prepared by varying these key assumptions. The low and high cost alternative sets of assumptions are intended to reflect growth rates for the various components of program costs which are more favorable and adverse, respectively, than those of the intermediate projection and which are not unreasonable themselves in light of the nature and historical experience of the program. As such, they provide a range of financial outcomes, within which the actual experience of the program might reasonably be expected to fall.

Table 8 indicates that, under the low cost assumptions, trust fund assets would exceed liabilities significantly by the end of June 1979 (the period through which financing has been established), reaching a level of 25 percent of the following year's incurred expenditures. If these low growth rates were actually to materialize, then subsequent financing rates could be adjusted downward in order to lower the excess of assets over liabilities to more appropriate levels. Under the high cost assumptions, trust fund assets would be approximately equal to liabilities by the end of June 1979. If these high growth rates were to occur, the program would remain just solvent and subsequent financing rates would have to be adjusted upward in order to generate more appropriate levels for the excess of assets over liabilities.

TABLE 8.—ACTUARIAL STATUS OF THE SMI TRUST FUND UNDER 3 SETS OF ASSUMPTIONS FOR THE 12-MONTH PERIOD ENDING WITH JUNE OF THE YEAR SHOWN

Ratio ¹	0.13	0.13	0.17	0.25	0.07	0.00

¹ Ratio of excess of assets over liabilities to the following year's total incurred expenditures.

CONCLUSION

The financing of the supplementary medical insurance program has been established through June 1979, by the promulgation of standard monthly premium rates (paid by or on behalf of each enrollee) of \$7.70 for the year ending June 1978 and \$8.20 for the year ending June 1979 and of adequate actuarial rates which determine the amount to be contributed from general revenue on behalf of each enrollee.

Under the intermediate assumptions used in this report, income to the trust fund is projected to exceed disbursements during both fiscal years 1978 and 1979. The assets in the trust fund, on a cash basis, are projected to increase from \$2,279 million at the end of fiscal year 1977 to an estimated \$4,273 million at the end of 1979. About two-thirds of this year-end balance, however, is attributable to liabilities for benefits and associated administrative costs which will have been incurred but not yet paid.

The actuarial status of the trust fund is expected to improve significantly, from an estimated excess of assets over liabilities of approximately \$368 million at the end of June 1977 to a projected \$1,421 million at the end of June 1979 (representing 13 percent of projected incurred expenditures for the following 12-month period). Even under more pessimistic assumptions as to cost increases, income produced on the basis of financing already established plus assets held in the trust fund will be sufficient for the trust fund to remain solvent through that period of time. Hence, the financing established through June 1979 is sufficient to cover projected benefit and administrative costs incurred through that time period and to build a level of trust fund assets which is adequate to cover the impact of a moderate degree of projection error.

APPENDIX A.—ACTUARIAL METHODOLOGY AND PRINCIPAL ASSUMPTIONS FOR COST ESTIMATES FOR THE SUPPLEMENTARY MEDICAL INSURANCE PROGRAM¹

1. ESTIMATES FOR AGED AND DISABLED (EXCLUDING ESRD) ENROLLEES

a. Introduction

Estimates for aged and disabled enrollees—excluding disabled persons with end stage renal disease (ESRD)—are prepared by establishing, as accurately as possible, reasonable charges incurred per enrollee in a recent year (fiscal 1976 for this report) and projecting these charges through the estimating period. The per enrollee charges are then converted to reimbursement amounts by subtracting out the per enrollee values of the deductible and coinsurance. Aggregate reimbursement amounts are calculated by multiplying the per enrollee reimbursement amounts by the projected enrollment. In order to estimate cash disbursements, an allowance is made for the delay between receipt of service and payment therefor.

Disabled persons with ESRD have per enrollee costs which are higher and quite different in nature from those of most other disabled persons. Hence, program costs for them have been excluded from the analysis in this section and are included in a later section.

b. Establishing a projection base

(1) Physician services

Reimbursement amounts for physician services (and small amounts for other services) are paid through fiscal intermediaries, referred to as carriers. The carriers determine whether billed services are covered under the program and determine the reasonable charges for the services. A record of the amount reimbursed after reductions for coinsurance and the deductible is transmitted to the central office in the form of a "payment record".

Payment records for 0.1 percent of aged beneficiaries and 1.0 percent of disabled beneficiaries are tabulated by date of service, thus providing a data base which is constructed on an incurred basis. Certain minor adjustments are made to the tabulated sample data to correct for biases and random fluctuation inherent in the sampling process. Having the data on an incurred basis is necessary to meet the statutory requirement that the program be financed on this basis; it also makes possible a comparison of program experience with non-program data sources.

As a check on the validity of the projection base, incurred reimbursement amounts are compared with cash expenditures reported by the carriers through an independent reporting system. In a program with

¹ Prepared by the Office of the Actuary, Social Security Administration.

continuously increasing incurred reimbursement amounts, cash payments are expected to be slightly lower than incurred expenses (except in the first year of coverage of a service or group of beneficiaries, when the difference should be substantial). These differences between cash and incurred reimbursement amounts occur because of the lag between receipt of services and payment therefor.

(2) *Institutional and other services*

Reimbursement amounts for institutional services under Part B are paid by the same fiscal intermediaries that pay for Part A services. The principal institutional services covered under Part B are outpatient hospital care and home health agency services.

Reimbursements for institutional services occur in two stages. Provider bills are submitted to the intermediaries, and interim payments are made on the basis of these bills. The bills are then submitted to the central office, and tabulations for a sample of beneficiaries are prepared in a manner parallel to that for payment records.

At the close of a provider's accounting period, a cost report is submitted and lump-sum payments or recoveries are made to correct for the difference between interim payments made to the provider and the retroactively determined reasonable cost for providing covered services (net of coinsurance and deductible amounts). The amounts of these retroactive settlements are reported on a cash basis, and approximations are necessary to allocate these payments to the time of service.

Group practice prepayment plans are reimbursed directly by the Health Care Financing Administration on a reasonable cost basis. Data are available for these payments only on a cash basis, and approximations must be made to assign expenses to the period when services were rendered.

(3) *Summary of historical data*

Table A1 summarizes the incurred reimbursement amounts per enrollee for the various services through fiscal year 1976. Also shown are average enrollment figures for these years. In order to analyze the historical trends in prices and use of services, these reimbursement amounts are converted to the reasonable charges or reasonable costs on which reimbursement was based. This process is necessary largely because the fixed deductible becomes a smaller percentage of charges each year and thus causes reimbursement to rise faster than charges or costs. Table A2 shows the reasonable charges or costs per enrollee corresponding to the reimbursement values shown in Table A1.

TABLE A1.—INCURRED REIMBURSEMENT AMOUNTS PER ENROLLEE: HISTORICAL

Year ending June 30—	Average enrollment (millions)	All services	Physician	Inpatient radiology and pathology ¹	Out-patient hospital	Home health agency	Group practice prepayment plan	Independent lab

c. Per enrollee increases

(1) Physician services

Per enrollee charges for physician services are affected by a variety of factors. Some of these can be identified explicitly. Others can be recognized only by the fact that the explicitly quantifiable factors do not explain all of the increase in per enrollee charges year-to-year.

Increases in average charge per service are one of the most important elements creating increasing charges per enrollee. The physician fee component of the consumer price index provides an estimate of the historical increases in average charge per service. Increases in this index are shown in the first column of table A3.

Bills submitted to the carriers during a 12-month period beginning July 1 are subject, by statute, to certain limitations on the level of fees to be recognized by the program for reimbursement purposes. The fee level recognized for a particular service by a physician is subject to reduction if it exceeds the median charge that the physician assessed for the same service in the preceding calendar year. This median charge is called the "customary" charge. Fees are subject to further reduction if they exceed the "prevailing" charge for the locality. The prevailing charge is defined as the 75th percentile of customary charges for a particular service in a particular locality. Since July 1, 1975, the rate of increase in prevailing charges has been limited further by the application of an "economic index". The customary and pre-

vailing charge limits maintained by the carriers are called "fee screens". Reasonable charges are charges on which reimbursement is based, after they have been reduced by the fee screens.

The average reduction in submitted fees has increased each year due both to deliberate administrative actions and to differentials in the rate of increase in fees between the calendar year in which the fee screens are established and the July to June period in which the screens are applied. The result is that the net increase in per enrollee charges due to price changes (i.e., the increase in fee levels recognized for reimbursement purposes) has been less than the increase in submitted fees. The second column of table A3 shows the reduction of charges due to the impact of the fee screen operation to date. The year-to-year changes in this impact are shown in the third column.

Per enrollee charges also have increased each year as a result of more physician visits per enrollee, increasing use of specialists and more expensive techniques, and other factors. The fifth column of table A3 shows the increase in charges per enrollee resulting from these residual causes. Because the measurement of increased recognized charges per service is subject to error, this error is included implicitly under residual causes.

The proportion of charges that have been denied as non-covered care has increased in most years. To the extent that this increase in denials reflects the effect of administrative actions defining covered services, it will cause a non-recurring distorting effect on the increase due to net residual factors. The gross residual factor, as adjusted for the impact of changes in denials, is shown in the sixth column of table A3. This column is used in the projection to indicate the amount of cost increases to be expected in the future from residual causes. The seventh column shows the net increase due to residual factors.

The last column of table A3 shows the total increase in charges per enrollee for physician services. It includes the effects of all the items discussed above.

Projected increases in total recognized charges per enrollee are shown in table A4. Column 1 of table A4 shows the projected average increase in customary charges in each of the years ending June 30, 1977 through 1981. As described above, each of these increases depends on the increases in fees actually submitted during the preceding calendar year. Thus, this column represents actual and projected average increases in physicians' fees for calendar years 1975 through 1979, respectively. In principle, further adjustments should be made for the year-to-year variations created by the process of selecting the 75th percentile of customary charges for each service in each locality to establish prevailing charges and for the fact that, of necessity, some fees are not screened in exactly the manner described (e.g., when new categories of services arise for which there is no historical data base). The impact on year-to-year increases in reasonable charges of these two factors is treated as negligible (although, of course, they have a substantial effect on the absolute level of fees). The effects of the economic index on the average charge increase is shown in column 2. The projected net increase in reasonable charges is shown in column 3; this compares with the corresponding historical data shown in column 4 of table A3.

The projection of residual factors assumes no further changes in the proportion of claims denied consistent with the very small changes observed in the last few years (see table A3).

TABLE A3.—COMPONENTS OF INCREASES IN TOTAL RECOGNIZED CHARGES PER ENROLLEE FOR PHYSICIAN SERVICES: HISTORICAL

(2) *Institutional and other services*

The historical and projected increases in charges or costs per enrollee for institutional and other services are shown in table A5. The year-to-year changes in some services have been quite erratic. At best, these series provide only a rough indication of future trends in costs.

TABLE A5.—INCREASES IN RECOGNIZED CHARGES AND COSTS PER ENROLLEE FOR INSTITUTIONAL AND OTHER SERVICES

d. Projected charges and costs

Table A6 shows projections of per enrollee incurred charges and costs based on the assumptions in tables A4 and A5. Table A7 shows the total reimbursement amounts per enrollee that result from subtracting the average amounts of copayment per enrollee from the total covered charges in table A6. The aggregate reimbursement amounts shown are derived by multiplying average enrollment by average reimbursement per enrollee.

TABLE A6.—INCURRED REASONABLE CHARGES OR COSTS PER ENROLLEE: PROJECTED

Year ending June 30—	All services	Physician	Inpatient radiology and pathology	Outpatient hospital	Home health agency	Group practice prepayment plan	Independent lab
Aged:							
1977.....	\$313.07	¹ \$243.75	\$12.55	\$39.66	\$7.90	\$5.65	\$3.56

2. ESTIMATES FOR PERSONS SUFFERING FROM END STAGE RENAL DISEASE

Certain persons suffering from end stage renal disease (ESRD) have been eligible to enroll for Part B coverage since July 1973 (under Section 299I of Public Law 92-603). For analysis purposes those enrollees suffering from ESRD who are also eligible as disability insurance beneficiaries are included in this section because their per enrollee costs are both higher and different in nature from those of most other disabled persons.

The estimates assume per enrollee cost increases of five percent annually and a continued rapid increase in enrollment. The historical and projected enrollment and costs are shown in table A8.

TABLE A8.—INCURRED REIMBURSEMENT AMOUNTS FOR END STAGE RENAL DISEASE

Year ending June 30—	Average enrollment (thousands)	Reimbursement amounts		
		Disabled ESRD and ESRD only		ESRD only, aggregate (millions)
		Per enrollee	Aggregate (millions)	
1974.....	11	\$11,091	\$122	\$84
1975.....	17	12,824	218	140

3. SUMMARY OF AGGREGATE REIMBURSEMENT AMOUNTS ON A CASH BASIS

Table A9 shows aggregate historical and projected reimbursement amounts on a cash basis, by type of beneficiary. The difference between reimbursement amounts on a cash basis and incurred reimbursement amounts results from the lag between the time of service and the time of payment.

TABLE A9.—AGGREGATE REIMBURSEMENT AMOUNTS ON A CASH BASIS

[In millions]

1981.....	9,436	1,064	932	11,432

4. ADMINISTRATIVE EXPENSES

The ratio of administrative expenses to benefit payments has been approximately 10 percent in recent years and is projected to decline slowly in future years. Projections of administrative costs are based on estimates of workloads and approved budgets for carriers, intermediaries, and Federal administration agencies.

APPENDIX B.—STATEMENT OF ACTUARIAL ASSUMPTIONS AND BASES EMPLOYED IN DETERMINING THE MONTHLY ADEQUATE ACTUARIAL RATES AND THE STANDARD MONTHLY PREMIUM RATE FOR THE SUPPLEMENTARY MEDICAL INSURANCE PROGRAM BEGINNING JULY 1978¹

This is a statement of actuarial assumptions and bases employed in determining the adequate actuarial rates and the standard monthly premium rate for the supplementary medical insurance program (SMI) for the period July 1978 through June 1979. The monthly adequate actuarial rate for enrollees age 65 and over is \$13.40. The monthly adequate actuarial rate for disabled enrollees is \$25.00. The standard monthly premium rate for both types of enrollees is \$8.20.

1. ACTUARIAL STATUS OF THE SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND

The law requires that the SMI program be financed on an incurred basis. That is, the income to the program during the 12-month period for which adequate rates are effective must be sufficient to pay for services (including associated administrative costs) rendered during that period even though payment for some of these services will not be made until after the close of the period.

The portion of income required to cover those benefits not paid until after the close of the year is added to the trust fund until needed. Thus, the amount of assets in the trust fund at any time should be no less than the cost of the benefits and administration incurred but not yet paid. Because the adequate rates are established prospectively, they are subject to projection error. As a result, the income to the program may not be equal to incurred costs; therefore, trust fund assets should be maintained at a level which is adequate to cover the impact of a moderate degree of projection error as well as the value of incurred but unpaid expenses. Table 1 summarizes the estimated actuarial status of the trust fund as of June 30 for each of the years 1976-78.

TABLE 1.—ACTUARIAL STATUS OF THE SMI TRUST FUND YEARS ENDING JUNE 30, OF 1976-78
[In millions]

Year ending June 30—	Assets	Liabilities	Assets less liabilities
1976.....	\$1,324	\$1,570	—\$246
1977.....	2,258	1,947	311
1978.....	3,320	2,314	1,006

¹ This statement appeared in the Federal Register of Dec. 30, 1977. Projections shown in this statement differ slightly from the projections shown in the rest of this report because of minor changes in assumptions since the rates were promulgated.

2. MONTHLY ADEQUATE ACTUARIAL RATE FOR ENROLLEES AGE 65 AND OLDER

The monthly adequate actuarial rate is one-half the monthly projected per capita cost for benefits and administrative expenses—adjusted to allow for interest earnings on assets in the trust fund, to allow for a contingency margin, and to allow for amortization of unfunded liabilities.

The monthly adequate actuarial rate for enrollees age 65 and older for the year ending June 30, 1979, was determined by projecting the fiscal year 1976 per capita cost by type of service. The projected costs for the years ending June 30 of 1976–79 are shown in Table 2. The 1976 values were established from program data. Subsequent years were projected using a combination of program data and data from external sources. The projection factors used are shown in Table 3.

The projected monthly rate required to pay for one-half of the total of benefits and administrative costs for enrollees age 65 and over for the year ending June 30, 1979, is \$13.48. The monthly adequate actuarial rate of \$13.40 provides an adjustment for interest earnings and a small margin for contingencies.

Promulgated monthly rate.....	7.50	10.70	12.30	13.40

TABLE 3.—PROJECTION FACTORS YEARS ENDING JUNE 30 OF 1977–79

[In percent]

	1977	1978	1979
Physicians' services:			
Fees ¹	² 10.8	8.8	7.9
Utilization ³	3.0	2.0	3.0
Outpatient hospital services per capita.....	30.0	25.0	25.0
Home health agency services per capita.....	30.0	25.0	25.0
Group-practice plan services per capita.....	15.0	15.0	15.0
Other services per capita.....	15.0	15.0	15.0

¹ As recognized for payment under the program.

² Reasonable charges were updated later than July 1, 1976 in most areas so the average cost increase shown in Table 2 is less than 10.8 percent.

³ Increase in the number of services received per capita and greater relative use of more expensive services.

3. MONTHLY ADEQUATE ACTUARIAL RATE FOR DISABLED ENROLLEES

The monthly adequate actuarial rate for disabled enrollees applies to persons eligible to enroll because they have been entitled to disability insurance benefits for not less than 24 consecutive months or because they are suffering from end stage renal disease. Projections for disabled enrollees (other than those suffering from end stage renal disease) are prepared in a fashion exactly parallel to projections for the aged, using the same actuarial assumptions. Costs for the end stage renal disease program are projected using a computer model because of the complex demographic problems involved. The combined results for all disabled enrollees are shown in Table 4.

The projected monthly rate required to pay for one-half of the total of benefits and administrative costs for disabled enrollees for the year ending June 30, 1979, is \$24.34. The monthly adequate actuarial rate of \$25.00 provides an adjustment for interest earnings and a small margin for contingencies.

TABLE 4.—DERIVATION OF PROMULGATED MONTHLY RATE FOR DISABLED ENROLLEES
YEARS ENDING JUNE 30 OF 1976-79

	1976	1977	1978	1979
Total benefits.....	\$13.85	\$16.82	\$19.78	\$22.60
Administrative expenses.....	1.57	1.45	1.66	1.74
Incurred expenditures.....	15.42	18.27	21.44	24.34
Value of interest on fund.....	— .31	— .41	— .53	— .68
Margin for contingencies and to amortize unfunded liabilities.....	3.39	1.14	4.09	1.34
Promulgated monthly rate.....	18.50	19.00	25.00	25.00

4. SENSITIVITY TESTING

Several factors contribute to uncertainty about future trends in medical care costs. In view of this, it seems appropriate to test the adequacy under alternate assumptions of the rates promulgated here. The most unpredictable factors which contribute significantly to future costs are outpatient hospital costs, physician utilization (measured indirectly and reflecting the use of more visits per capita, the use of more expensive services, and other factors not explained by simple price per service increases), and increases in physician fees as constrained by the program's reasonable charge screens and economic index. Two alternative sets of assumptions and the results of those assumptions are shown in Table 5. All assumptions not shown in Table 5 are the same as in Table 3.

Table 5 indicates that, under the assumptions used in preparing this report, the promulgated monthly rates will result in an excess of assets over liabilities of \$1,212 million by the end of June 1979. This amounts to 12 percent of the estimated total incurred expenditures for the following year. Assumptions which are somewhat more pessimistic produce a deficit of \$68 million by the end of June 1979, although the balance in the trust fund remains positive allowing the program to continue paying claims as presented. Under fairly optimistic assumptions, the promulgated monthly rates will result in an excess of assets over liabilities of \$2,169 million, which amounts to 25 percent of the estimated total incurred expenditures for the following year.

TABLE 5.—PROJECTION FACTORS AND THE ACTUARIAL STATUS OF THE SMI TRUST FUND UNDER ALTERNATIVE SETS OF ASSUMPTIONS YEARS ENDING JUNE 30 OF 1978-79

	This projection		Low assumption		High assumption	
	1978	1979	1978	1979	1978	1979
Projection factors (in percent):						
Physicians' fees ¹	8.8	7.9	7.3	6.4	10.3	9.4
Utilization of physicians' services ²	2.0	3.0	0.5	1.0	4.0	50.0
Outpatient hospital services per capita.....	25.0	25.0	15.0	15.0	40.0	40.0
Home health agency services per capita.....	25.0	25.0	15.0	15.0	40.0	40.0
Actuarial status (in millions):						
Assets.....	\$3,320	\$3,939	\$3,522	\$4,711	\$3,059	\$2,917
Liabilities.....	2,314	2,727	2,242	2,542	2,415	2,985
Assets less liabilities.....	1,006	1,212	1,280	2,169	644	-68
Ratio of assets less liabilities to expenditures (in percent) ³	11	11	15	23	6	-1

¹ As recognized for payment under the program.

² Increase in the number of services received per capita and greater relative use of more expensive services.

³ Ratio of assets less liabilities at the end of the year to total incurred expenditures during the following year, expressed as a percent.

5. STANDARD PREMIUM RATE

The law provides that the standard monthly premium rate, promulgated to apply for both aged and disabled enrollees, shall be the lesser of:

(a) The adequate actuarial rate for enrollees age 65 and older;
or

(b) The current standard monthly premium, increased by the same percentage that the level of old-age survivors, and disability insurance (OASDI) benefits has been increased since the May preceding the promulgation (and rounded to the nearer dime).

The standard monthly premium rate for the 12-month period ending with June 30, 1978, is \$7.70. The OASDI benefit table was increased 5.9 percent in June 1977. The \$7.70 rate increased by 5.9 percent, and rounded to the nearer ten cent multiple, is \$8.20. Since this is less than the adequate actuarial rate, the standard premium rate is \$8.20 for the twelve months ending with June 1979.
